For Detailed Index see p. 679.

IN presenting to their customers the 13th Edition of their Fixtures and Glassware Catalogue, the Company wish to state that the illustrations have been drawn or photographed from the originals, and will be found faithful reproductions of the articles.

The Company's object in compiling this Catalogue has been to furnish a complete and useful guide, and a standard reference book for Electrical Engineers, Contractors, Architects, and Export Merchants at home and abroad. The contents are arranged in a systematic manner; each article has been drawn to scale; and the texture, thickness, and finish of the material, and other details of construction, are shown as far as possible.

The quality and beauty of workmanship that the Company have always studied to attain, and the success they have met with have gained for them a world-wide reputation. This enables them to offer the fittings herein illustrated with the full confidence that the articles supplied will be in every way satisfactory.

SHOWROOMS:

The attention of Architects, Electrical Engineers and Contractors generally, is drawn to the fine suite of showrooms, fitted up and wired for the benefit of their clients at No. 67, Queen Victoria Street, London, E.C. In these extensive showrooms are exhibited fittings in accordance with all periods and styles of architecture, such as the Classic French styles—Louis XIV., XV. and XVI., Empire, Renaissance, Adams, Georgian, Elizabethan, and Modern, as well as an unrivalled collection of Statuary.

Further showrooms are devoted to simple and inexpensive fittings for public and domestic use, Shops, Ship Lighting, etc., which do not fall under the category of any of the above styles. For the convenience of our country clients showrooms are attached to our Branches in Manchester, Glasgow, Birmingham, Newcastle, Cardiff, Dublin and Belfast.

DESIGNS:

The designs submitted in this Catalogue are produced by the Company's own artists, and are the Company's exclusive property. The artists are at the disposal of clients requiring designs for any special purposes, which designs are prepared free.

MANUFACTURE:

The success which the Company's Fixture Department has met with, has encouraged them to make further additions to their Works, Showrooms, and Stockrooms, and they have now the best equipped workshops and the most skilled craftsmen at their factory in Birmingham engaged upon the production of the articles illustrated in this catalogue.

Owing to the large stock held at the Company's various warehouses, both in London and country, delivery can, in most instances, be given by return for orders for standard articles, and special lines can generally be executed in from seven days from receipt of order, according to the nature of the article.

Particular attention has been bestowed on perfect insulation, prevention of fire risks, convenience of wiring and fixing, and durability, and great trouble has been taken to establish standard sizes of screws, threads, fixing holes, and standard dimensions of accessories. The importance to manufacturers and buyers, especially in the export trade, of acknowledged standard sizes cannot be overestimated. The first Edition of our F and G Catalogue contained the first attempt to standardize the sizes of openings of Glassware, such as $1\frac{1}{8}$ in., $2\frac{1}{2}$ ins., and $3\frac{1}{4}$ ins., and the corresponding sizes of Glassholders for same. These have become universal, and we trust that the further efforts contained in this Edition, in connection with Osram Lamps, will be appreciated, as were our original attempts.

H.V. SYSTEM:

All articles under the headings Accessories, Counterweight Fittings and Pendants are constructed in accordance with the principle of the H.V. system, rendering them safe from fire risks.

SCREW THREADS:

The pitch of our brass threads is in all cases 26 to the inch.

NIPPLES:

All nipples are screwed for $\frac{1}{2}$ -in. thread unless otherwise stated; ship fittings shown on pages 714 to 720, however, are stocked $\frac{3}{8}$ -in., to allow for larger wires as used in shipwork.

The "spread" of electroliers is to be taken as twice the distance from centre of body to lampholder nipple.

LACQUER:

All our goods are hot-lacquered three times, and can be supplied in any finish to order.

SHADES, HOLDERS:

All our shades and holders are made for the following openings:— $1\frac{1}{8}$ in., $2\frac{1}{2}$ ins., $3\frac{1}{4}$ ins., and 4 ins. for single lamps; $5\frac{1}{2}$ ins. for two lamps; 6 $\frac{1}{2}$ ins. and 8 in. for clusters of 3 or more carbon or Osram Lamps.

FINISHES:

Prices given in Catalogue are for polished brass, antique brass, steel bronze, florentine bronze, or bronzed and relieved:

Extra for oxidized copper or real bronze finish	10	per cent.	
" oxidized silver or real bronze metal	20	per cent.	
" silver plated, from	33 $\frac{1}{2}$	per cent.) According to amount of silver or gold deposited.
" real gilt, from	50	per cent.	

WIRING:

The prices are for goods unwired.

NAMES OF FIXTURES:

Practically every article has been given a distinctive name and number in order to facilitate telephonic and telegraphic orders.

**F 21575**

This is undoubtedly the *strongest*, simplest and most effective chain yet designed for the purposes of concealing electric light wires.

Amongst the many advantages which it possesses may be mentioned:

No friction on wires

Perfect accessibility.

Ease of wiring.

Equally suitable for one or more circuits

The appearance of unsightly wires is entirely done away with.

	Polished Brass.	Oxidized Copper.	Oxidized Silver.

FOR CEILING PLATES, HOOKS, NURLS, ETC.,

For use with these Tubes and Chains see pages 682 and 684.

CANDLE FITTINGS.

F 21579

F 21579**1/3 each**

Telescopic Candle Fitting,
complete with Adjustable
Rubber Plug and Springs
Will fit inside any length Opal
Tube up to 6ins.

Extra
Lamp and Lampholder.

F 21581

F 21581

Huntalite Patent Candle

100-200 Volts.

3/9 each

Over 200 Volts.

4/3 each

The special feature of this
Candle is the absence of
interior fittings, the Lamp
and Opal Tube being com-
bined in one piece. No
shadows are therefore
apparent on the Tube and
an exact resemblance to an
ordinary Wax Candle is the
result.

F 21585**1/- each**

Long slotted S.B.C. Lamp-
holder, with Adjustable
Rubber Grip for use with
above.

F 21583

F 21583Low Voltage, **3/9 each**High Voltage, **4/3 ..**With Carbon Filament
Lamps**F 21584**

For Osram Lamps.

2/- each

Without Lamps.

The advantages of using this
Candle may be summarized
as below:—

(1) Rigidity when fixed, the
Rubber Expanding Plug
being the best method of
attachment to Candle Socket,
while the Spring shown,
draws the Lamp firmly on to
tube, and the Tube in turn
tightly on to the Bevelled
Rubber. No shake is there-
fore possible a fault which
is present in other Candle
Fittings.

(2) Illumination of Tube
giving realistic appearance
of Wax Candle

(3) Security of attach-
ment. No amount of vibra-
tion can loosen the fitting
when fixed.

(4) Always upright

Stocked to fit 4 and
6in. Candle Tubes.

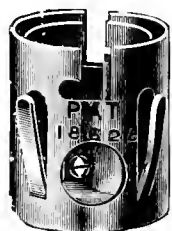

F 21584

WHITE OR YELLOW OPAL TUBES OR CANDLES.

PATENT SELF- ADJUSTING LAMP-HOLDER.

"NEW ERA"

FIXTURES BLOCK.

F 21948

4 1/2 Face, Two Circuit. 12 - doz.
Imitation Walnut

White Enamelled, or Teak Blocks 1 - per doz. ext.

The latest and most convenient, which is suitable for use with Brackets and Electrodes, effectually overcomes the old objection to Hand made Joints. No less than six fittings can be fixed to the "New Era" blocks in the same time that would be taken to fix one fitting only to ordinary block with Hand-made Joint. The blocks are able to be removed without cutting wires or in any way damaging decorations.
